

Social Determinants of Health Coordination

DAAA Regional Service Definition

Service Definition: Programs and services which coordinate and integrate social and health services that support health and well-being, education, social and community context, economics and retirement planning as well as neighborhoods and built environment that tie to age-friendly community strategies and increased access to technology across older adults, persons with disabilities, caregivers and the service provider network.

Allowable Services:

1. Delivery of health care services through enhanced access to care and technology to reduce premature death and health disparities of older adults, family caregivers and older persons with disabilities.
2. Increasing access to resources for aging, education and life-long learning with older adults has a voice in what's best for them.
3. Access to economics and retirement planning, comprehensive benefits screening, employment and training opportunities that yield financial literacy and security.
4. Better coordinated and integrated supportive services including mental health, spirituality, and substance abuse prevention.
5. Engagement of intergenerational groups as well as public and private partnerships that make aging in place possible, safe and successful.
6. Implementation of technology solutions to combat the digital divide across the Social Determinants of Health domains.

Rationale: Findings from the Detroit Area Agency on Aging's Dying Before Their Time Report and its Inclusive Healthcare Partners-in-Action Initiative necessitate the development of modernized, transformative and innovative service strategies that integrate and coordinate individual, group and/or community-wide services centered in an age-friendly community, health-focused an age friendly community, health-focused framework. This consists of the deployment of technology, increased access to broadband and training with technical support.
